Write a brief paragraph(s) that highlights strengths and, if applicable, offers constructive feedback.

Keep the tone respectful and focus on the outcome (what was done), not personality. Consider using AI to ensure that the recipient receives the peer review in a positive and productive manner, even if constructive feedback is required.

Working with Enoch throughout Version 3 was great. He consistently brought solid ideas to the table during our brainstorming sessions, and it was great to bounce back ideas with someone who brought new ideas to the table. He stayed collaborative as we worked through issues, and his willingness to validate fixes and double-check queries made the process more reliable. The teamwork was strong, communication stayed open, and the back-and-forth problem-solving made the project better.

The only suggestion I'd offer is to be a bit more confident in taking the lead at times. He has good instincts and strong technical ideas, so leaning in more and communicating proactively would make their contributions even more impactful.

Overall, Enoch was a great teammate, and I'd be happy to work with him again.
